BELLA DC-1300

Cleaning of HP Indigo
printing machine parts

- ✓ **Automatic** BID-Cleaning (up to 4 BID's)
- ✓ **Integrated recycling** of the Imaging Oil
- ✓ **Saves** time and money
- ✓ **No** exhaust system needed

Easy cleaning

Would you like to clean your HP INDIGO accessories quickly and cost-effective?

The BELLA DC-1300 is the perfect solution for you! The manual cleaning system enables you to remove the ink residues from the ink tanks and form rollers via the flow-through brush quickly and easily.

With the optionally available BID cleaning station, up to four BID's can be **automatically** flushed with HP specific Imaging Oil.

Another highlight is the **integrated recycling** system, which continuously removes ink particles from the Imaging Oil. This reduces operating costs and the volume of hazardous waste to a minimum.
